

MacBook Air Models A1237 and A1304 Logic Board Bracket Replacement

Written By: Walter Galan

INTRODUCTION

The logic board bracket holds the trackpad control cable connector and the AirPort/Bluetooth connector securely to the logic board.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)

PARTS:

- [MacBook Air Logic Board Bracket](#) (1)

Step 1 — Lower Case

- Remove the following 10 screws securing the lower case to the Air:
 - Six 2.8 mm Phillips screws.
 - Two 3.8 mm Phillips screws.
 - Two 5.4 mm Phillips screws.

Step 2

- Slightly lift the lower case near the vents and push it toward the rear of the computer to free the mounting tabs.

Step 3 — Battery

- Disconnect the battery connector by pulling it straight out of its socket.

Step 4

- Remove the following nine screws securing the battery to the Air:
 - Four 2.9 mm Phillips.
 - Four 3.8 mm Phillips.
 - One 7.2 mm Phillips.

Step 5

- Lift the battery out of the Air.

Step 6 — Logic Board Bracket

- Remove the two small Phillips screws securing the logic board bracket to the upper case.

Step 7

- Lift the logic board bracket out of the upper case.

To reassemble your device, follow these instructions in reverse order.
